

## OPEN ROOM

Everything you need to stay up to date with the energy transition

Conferences, forums, courses, articles and podcasts where knowledge is shared

*repsol*  
fundación

# Programme Open Room 2026

This programme is subject to change. Registration will be available two weeks in advance via the Open Room calendar. Recordings of past online or hybrid events are available on Open Room.

JANUARY

## **Towards Net Zero: Sines and the pathways to industrial decarbonisation. Event, Sines (Portugal)**

An event dedicated to the strategic role of Sines in industrial decarbonisation, bringing together experts to discuss technological pathways, investments and opportunities within the energy transition.

## **Energy in 2025 and outlook for 2026. Webinar**

Presentation of the 2025 Energy Statistical Yearbook, prepared by Repsol, and an analysis of energy market developments in the current geopolitical context. Yearbook available at [repsol.com](https://repsol.com).

# Programme Open Room 2026

This programme is subject to change. Registration will be available two weeks in advance via the Open Room calendar. Recordings of past online or hybrid events are available on Open Room.

FEBRUARY

## 14th FUNSEAM Business Symposium. Event, Barcelona

A new edition focusing on the main pillars of the strategy that will drive a structural transformation of the economy through the net zero industry.

## The new battery value chain in Spain. Webinar

This webinar will analyse the battery value chain — from materials and components to second life and recycling — and the key role of the “Battery Passport” concept in regulatory compliance and transparency. A round-table discussion with sector representatives will also take place, sharing their perspectives and experience, as well as links to digitalisation and traceability initiatives such as Catena X.

# Programme Open Room 2026

This programme is subject to change. Registration will be available two weeks in advance via the Open Room calendar. Recordings of past online or hybrid events are available on Open Room.

MARCH

## Faconauto Congress 2025. Event

Reflection and debate on the main conclusions and outlook for dealerships and their supplier companies..

## Towards circular carbon: new decarbonisation strategies. Webinar

This online event will explore which solutions are already working in industry, which opportunities are emerging and how circularity is redefining production models.

## Investment challenges in hydrogen projects. Webinar

Webinar dedicated to the role of hydrogen as a key energy vector for decarbonisation.

## Young people and the energy transition. Event, Madrid

An event addressing the main challenges facing young people in the context of the energy transition and other issues of concern to youth.

## CO<sub>2</sub> management as a strategic lever for the energy transition. Webinar

In this webinar, sector experts will share insights on current challenges, innovation opportunities and the role of CO<sub>2</sub> management in accelerating a fair, competitive and data driven transition.

# Programme Open Room 2026

This programme is subject to change. Registration will be available two weeks in advance via the Open Room calendar. Recordings of past online or hybrid events are available on Open Room.

APRIL

## The last technological mile of renewable fuels. Webinar

Online session focused on sustainable transport challenges to drive decarbonisation of the sector.

## Power2HVO. Webinar

Based on the study Portugal Offshore Wind, Green Hydrogen, and Sustainable Fuels: Power to X Pathways, prepared by the National Laboratory of Energy and Geology (LNEG), this session explores the current state of offshore wind in Portugal and opportunities for the commercialisation of sustainable fuels.

## Waste and biomass valorisation: connecting research, industry and competitiveness. Event, Ciudad Real

An event aimed at fostering dialogue and collaboration around waste recovery and biomass valorisation as levers of the energy transition and industrial competitiveness.

# Programme Open Room 2026

This programme is subject to change. Registration will be available two weeks in advance via the Open Room calendar. Recordings of past online or hybrid events are available on Open Room.

MAY

## Course: Energy efficiency and CAEs. Online

Energy efficiency is key to the energy transition. This online course addresses the role of promoting energy efficiency in decarbonising different sectors and the contribution of CAEs.

## Decarbonisation of the metallurgical sector. Webinar

Webinar on technological innovation and competitiveness in the metallurgical industry.

## Impact of circulating fleet census strategies on air quality. Webinar

This webinar analyses the challenges and opportunities of circulating fleet census strategies and their direct impact on urban air quality.

## Sernauto Annual Event. Event, Madrid

In person meeting in Madrid with the automotive value chain to discuss the future of sustainable mobility

# Programme Open Room 2026

This programme is subject to change. Registration will be available two weeks in advance via the Open Room calendar. Recordings of past online or hybrid events are available on Open Room.

JUNE

1/2

## **Euro American Green Hydrogen Forum. Event, Oviedo**

International congress on green hydrogen, renewables and the circular economy as drivers of sustainable development.

## **CIBITEC 2026. 8th Ibero American Congress on Science and Technology. Event**

A meeting bringing together engineering and technology professionals from Spain and Latin America to address global challenges and solutions offered by technology and engineering.

## **Geopolitics and energy. Webinar**

There have been various situations in recent times that have increased tension on the global stage. This conference will analyse these and other current issues within the framework of the energy transition.

## **Regulatory framework for negative emission technologies. Webinar**

Webinar on public policies to promote CO<sub>2</sub> capture and storage technologies as a contribution to climate neutrality.

## **Course: Hydrogen and renewable gases. Online**

Online course on hydrogen as an energy vector, where the regulation, the hydrogen economy in the different stages of its value chain such as production, storage, transport, safety in the handling of this gas and final applications in industry and mobility will be analyzed. Aimed at all those who want to have an up-to-date idea of the trends that are underway in the world of green hydrogen.

# Programme Open Room 2026

This programme is subject to change. Registration will be available two weeks in advance via the Open Room calendar. Recordings of past online or hybrid events are available on Open Room.

JUNE

2/2

## **Industry decarbonisation and competitiveness from a university perspective. Event**

Hybrid event with students from the Chairs Network to discuss industry and competitiveness.

## **Sustainable mobility. Webinar**

Online event that will focus on the challenges of land transport in the commitment to climate neutrality.

## **Data centres and renewable energy. Webinar**

Webinar that studies the integration of renewables in digital infrastructures. Online format.

## **Product traceability. Webinar**

This webinar focuses on life cycle assessment methodologies applied to sustainable mobility.

## **Course: Energy storage and electricity grids. Online (1/2)**

Specialized course in storage technologies and network management, where an analysis and reflection will be made on the role of storage in the energy transition and the different applications in the electricity grid.

## **Webinar series: CO<sub>2</sub> as a feedstock and its role in the energy transition (session 1)**

Webinar on the challenges of CO<sub>2</sub> capture and feedstock capture technologies and their contribution to the climate neutrality commitment.

# Programme Open Room 2026

This programme is subject to change. Registration will be available two weeks in advance via the Open Room calendar. Recordings of past online or hybrid events are available on Open Room.

JULY

## Course: Energy storage and electricity grids. Online (2/2)

Specialized course in storage technologies and network management, where an analysis and reflection will be made on the role of storage in the energy transition and the different applications in the electricity grid.

## Course: Energy transition. Online

Comprehensive training delivered by leading experts, covering the key levers required to achieve an agile, cost efficient energy transition in Spain, based on innovation and digitalisation and committed to technological and industrial development.

# Programme Open Room 2026

This programme is subject to change. Registration will be available two weeks in advance via the Open Room calendar. Recordings of past online or hybrid events are available on Open Room.

SEPTEMBER

1/2

## Geopolitical context and outlook. Event, Madrid

Event that will examine the global energy and geopolitical context, within the framework of the energy transition

## Circular Economy cycle (sessions 1 and 2). Webinar

A series of conferences providing an in depth look at the regulatory framework for the circular economy and analysing applications and trends across industrial sectors.

## Decarbonisation of the metallurgical industry. Webinar

Webinar focused on technological innovation to contribute to the reduction of emissions in metallurgy.

## Biomethane. Webinar

Online event focused on biomethane as a key pillar for decarbonising mobility and industry, with particular attention to challenges in Portugal.

## Course: Renewable fuels. Online

In this online course, we will delve into the present and future of these fuels, which are one of the real technological alternatives, to face the process of decarbonization of the transport sector in all its forms.

## Circular economy (plastics, slurry, UCO). Webinar

Through this online event, different applications of circularity projects will be presented and analysed

# Programme Open Room 2026

This programme is subject to change. Registration will be available two weeks in advance via the Open Room calendar. Recordings of past online or hybrid events are available on Open Room.

SEPTEMBER

2/2

## **Sustainable mobility. Webinar**

Through this online event, the technological challenges and sustainable transport policies will be addressed, in the face of climate neutrality objectives.

## **Energy transition challenges and opportunities for companies in Cordova. Event, Cordova**

Face-to-face conference aimed at the Cordovan business fabric to identify competitive opportunities in the energy transition.

## **Textile recycling: the major circular opportunity for industry in Spain. Online event**

Online event where the challenges of circularity in the Spanish textile industry are addressed.

# Programme Open Room 2026

This programme is subject to change. Registration will be available two weeks in advance via the Open Room calendar. Recordings of past online or hybrid events are available on Open Room.

OCTOBER

## Circular Economy cycle (session 3). Webinar

A series of conferences that delves into the regulatory framework around the circular economy and analyzes the different applications and trends of circularity in various industrial sectors

## Circular innovation for the future of business competitiveness. Webinar

Online session dedicated to circular solutions that boost and contribute to the competitiveness of companies

## 5th Industrial Vehicle Observatory. Event, Madrid

This meeting will address the challenges of the industrial vehicle towards sustainable mobility, as well as trends in the sector.

## Course: Towards a circular economy. Online

Through this training, the current regulatory framework on the circular economy will be explored and circular business models and waste recovery will be presented, in different economic sectors.

## Uses of CO<sub>2</sub>. Webinar

Online event where various technological applications of captured CO<sub>2</sub> will be explored.

## Impact of fleet renewal in Spain on sector decarbonisation. Event, Madrid

Through this event, the challenges of the renewal of the Spanish vehicle fleet will be addressed, taking into account its impacts in terms of the reduction of emissions, road safety and socio-economic development of the sector.

1/2

# Programme Open Room 2026

This programme is subject to change. Registration will be available two weeks in advance via the Open Room calendar. Recordings of past online or hybrid events are available on Open Room.

OCTOBER

## Course: Circular innovation for the future of business competitiveness. Online

Training focused on the innovation of circularity models that contribute to greater business competitiveness.

2/2

# Programme Open Room 2026

This programme is subject to change. Registration will be available two weeks in advance via the Open Room calendar. Recordings of past online or hybrid events are available on Open Room.

NOVEMBER

1/2

## **Municipal solid waste. Webinar**

Webinar that addresses the opportunities for the energy recovery of municipal waste within the framework of the energy transition.

## **Energy transition challenges and opportunities for companies in Galicia. Event, Galicia**

Face-to-face conference in A Coruña aimed at companies facing the challenges of the energy transition.

## **Life Cycle Assessment. Webinar**

Webinar on the environmental impact of energy sources and modes of transport.

## **Sustainable mobility. Webinar**

Online session with experts who will address the challenges of mobility, to contribute to the energy transition.

## **Mapping the new geopolitics of energy: security, climate and competition. Webinar**

Through this online event, the challenges in the current geopolitical context, in terms of security, climate and competition, will be explored.

## **Technology based innovation entrepreneurship cycle. Webinar**

This first webinar of the cycle will address the keys to undertaking innovative technology-based projects.

# Programme Open Room 2026

This programme is subject to change. Registration will be available two weeks in advance via the Open Room calendar. Recordings of past online or hybrid events are available on Open Room.

DECEMBER

## Webinar series: CO<sub>2</sub> as a feedstock and its role in the energy transition (session 2)

Webinar on the challenges of CO<sub>2</sub> capture and feedstock capture technologies and their contribution to the climate neutrality commitment.

## Decarbonisation of air and maritime transport. Event, Cartagena

The event aims to promote dialogue and collaboration around the decarbonisation of air and maritime transport as levers for the energy transition and industrial competitiveness.

2/2
